

Technaxx HDMI WIFI HDD-PLAYER + Recorder

Directly playback of audio-, video- and photo data files on TV-set; with or without PC possible; Not only by internal / external hard drive, SD- / MMC- / MS-memory card, USB-stick, but also via streaming from PC by LAN or W-LAN.

The shapely Technaxx HDMI WIFI matches in every living room because of its small and slim shape (205x50x190mm). Your favourite videos, photos and music titles can be played back in **HD quality** on the TV-set (PAL and NTSC) in format 4:3 and 16:9.

Memory capacity is enormous because of the possibility to build in a SATA I/II hard drive up to 1TB* (*not enclosed in delivery). The device supports FAT32 as well as NTFS formatting.

Timer recordings complete all functions of the HDMI WIFI. [Recordings of several hours are spitted automatically in approx. 4.2GB files to make the transfer on DVD easier!]

**A „piece of jewellery“
for the living room**

Sie brauchen nicht mehr überlegen, welche Dateien und Daten Sie speichern wollen, sondern nur noch, welche Sie sich anschauen wollen – von HDD, USB, Netzwerk oder Speicherkarte.

**Without cable happy!
Usable without PC è Personal Video
Recorder**
